Date
15 May 2024/16. Mai 2024

Product Ending: Profibus-DP in the types B01 and B02 as of 15.05.2024

Dear Sir or Madam,

Product changes, but also product discontinuations, mainly serve the continuous product improvement or the stabilization of the product group with regard to hardware, firmware and associated software.

1) Affected products

- All REG-D, REG-DP (with Profibus module) devices with the feature B00, B01, B02
- All REG-DA, REG-DMA, REG-DPA (with Profibus-DP) devices with feature Z99

2) Reason for discontinuation

One or more supplier companies have discontinued necessary components that require a change to the existing system.

3) Available functionally identical replacement devices

The company A. Eberle continues to provide the product Profibus-DP (B00) as a top-hat rail model. A plug-in solution for 19" systems is no longer provided (B01, B02).

4) Existing devices in the field

- The guaranteed warranty period will be adhered to in all cases
- Product support for devices in the field will continue as usual
- Repairs to profibus modules will be carried out, but can be replaced by the successor model if repair is no longer possible

5) Transition period (last order)

Due to the poor availability of important components, there will be no transition period. The obligatory "last order" is therefore no longer applicable. At the moment there is a need to change to a top-hat rail model (B00) if you have been using a 19" solution until now.

- a) Please pass this product information on to your employees, colleagues and, if applicable, to your customers.
- b) We apologize for any inconvenience this discontinuation may cause. We will do everything possible to carry out this action as convenient as possible and without affecting delivery times.

If you have any queries, please contact your first point of contact directly.

Yours sincerely

Managing Director
